Environmental and Social Completion Sheet (ESCS)

Overview

| | |
|----------------------|--|
| Project Name: | SPINDIAG (COVID-19) (IDFF) |
| Project Number: | 2018-0826 |
| Country: | Germany |
| Project Description: | Aim of the Project is to improve the Company's new COVID-19 PCR-based rapid test and to develop rapid tests against other infectious diseases, such as the ones caused by respiratory or antibiotic-resistant pathogens. |

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Project involved investments in research and development activities without any reported negative effects on the environment. No major environmental issues were identified.

Although some knowledge externalities occurred during implementation, the Project did not achieve the anticipated technological and social outcomes from the appraisal stage, primarily because of the insolvency and liquidation process affecting the Promoter.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the Promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
