Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name: EDUCATION SEINE-SAINT-DENIS
 Project Number: 2016-0936
 Country: FRANCE
 Project Description: *Financement du Programme pluri-annuel d'investissement du département dans le secteur de l'Enseignement, en particulier dans les colleges.*

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Promoter undertook to disclose any EIA that would be required for any of the components included in the Project. None of the components required an EIA and no disclosures were made to the Bank. The Project sites were already within respective city and/or regional plans and were situated in most cases on existing school estates. The investments financed by this Project were planned, designed and implemented in accordance with the energy and environmental standards set by the Department for construction, which are in line with the standards requested by French law. The investments placed an emphasis on increased resilience towards climate change risks, reducing energy consumption, reducing greenhouse gas emissions, reducing waste and increasing renewable energy generation. The Project supported investments to achieve these objectives whilst at the same time making improvements to the internal learning and working environment for the students and staff alike. No significant environmental or social issues were noted during Project implementation.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the Promoter and/or inputs provided by Lenders' Supervisors and others, where applicable, during Construction that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
