Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	SEBES-TURDA A10 HIGHWAY (SPL 2015-0712)
Project Number:	20190588
Country:	Romania
Project Description:	The motorway aims to provide a link between the existing motorway sections A1 Orastie-Sibiu and A3 Gilau - Campia Turzii, with a total length of approx. 70 km, a design speed of 120 km/h, including 7 junctions, 4 service points, 4 rest areas, 1 maintenance and control centre, 1 maintenance and monitoring centre and 66 structures.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The project involved the construction of a new 70 km motorway (A10) on a new alignment. The project is part of the TEN-T core network and will provide a link between Sebes and Turda, in the North-West and Centre of Romania.

At the time of project appraisal and approval in December 2022, the project was nearly complete, with all sections open to traffic. The remaining works were finished in the first quarter of 2023.

At the time of project completion, implementation of mitigation measures, and land acquisition have been finalised.

No significant environmental or social issues were identified during the implementation or at completion of the project.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter and site visits by the EIB team during Construction that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
