## Environmental and Social Data Sheet

### Overview

Project Name: TECH EU - PROSEGUR SECURITY & DIGITAL INNOVATION  
 Project Number: 2025-0583  
 Country: Spain  
 Project Description: The Project concerns the Promoter's RDI and digital transformation plan, which involves developing innovative solutions in areas such as advanced cybersecurity technologies, Software as a Service (SaaS) solutions and IoT systems. The activities will take place primarily at the Promoter's European technical centres in Spain.

E&S Risk categorisation Low

Project included in Carbon Footprint Exercise<sup>1</sup>: no

### Environmental and Social Assessment

#### Environmental Assessment

The investment will support the promoter in the implementation of its roadmap with regard to technology and RDI in relation to its products and services and the digital transformation of its business processes. The project activities do neither fall under the Annexes I nor II of the EU Directive 2011/92/EU amended by the EIA Directive 2014/52/EU. The project will be carried out in existing facilities, already authorised, that will not change their scope due to the project. As such, the project activities are not subject to an Environmental Impact Assessment (EIA).

#### Climate Assessment

The project has minimal impact in terms of climate risk and is aligned to the Paris Agreement for low-carbon criteria as published in the EIB Climate Bank Roadmap under the Industry and RDI sector.

The Promoter is in scope and screened out of the PATH framework. It does not operate in a high-emitting sector and is not considered as a highly vulnerable counterpart.

#### Social Assessment

The project does not carry significant labour risks and risk to health and safety is regarded minimal, with the overall social risk being low. The promoter fosters social inclusion and diversity within its workforce.

<sup>1</sup> Only projects that meet the scope of the Carbon Footprint Exercise, as defined in the EIB Carbon Footprint Methodologies, are included, provided estimated emissions exceed the methodology thresholds: 20,000 tonnes CO<sub>2</sub>e/year absolute (gross) or 20,000 tonnes CO<sub>2</sub>e/year relative (net) – both increases and savings.

## Conclusions and Recommendations

The project has minimal impact in terms of environment, climate and social aspects. Furthermore, the project activities neither fall under the Annexes I nor II of the EU Directive 2011/92/EU amended by the EIA Directive 2014/52/EU; therefore, an Environmental Impact Assessment (EIA) is not required. Likewise, likely social effects are regarded non-significant.

Considering the above, the investment is acceptable for EIB financing in Environmental, Climate and Social terms.
