Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Promoter reported that the project was developed according to the requirements defined in the relevant EIAs (Environmental Impact Assessment) and associated documents and permits issued by the competent authorities.

Conditions and undertakings

The following environmental conditions and undertakings were defined at appraisal and included in the contractual documents:

Conditions before 1st disbursement:

- *The Promoter shall deliver before any disbursement related to components 1) and 2) copy of the Natura 2000 Declaration (Form A or B) issued by the competent authority.*
- *The Promoter shall deliver before any disbursement related to component 2) copy of the screen out decision, exempting the project from a full EIA, issued by the competent authority.*

The Promoter submitted the required documents issued by the competent authorities before the related disbursements, complying with the relevant conditions for the financed components.

Undertakings

- *The Promoter shall ensure that an adequate ESMP, defined according to the relevant EIAs and corresponding environmental authorisations (DIAs) is implemented and monitored during the construction of the project, and will notify the Bank of any*

unexpected environmental impact or incident during the construction of any component.

The Promoter reported that no major environmental incidents or issues were registered during construction, and the project was implemented and monitored in line with what was defined at appraisal stage and the relevant national and European legislation.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter during construction and at completion, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
