

Table of Contents

Introduction ...	8
Chapter A: Description of the environment relating to the plan ...	10
1.1 Background maps ...	10
1.1.1 Location map ...	10
1.1.2 Measurement map ...	10
1.1.3 Orthophoto of the site plan ...	10
1.2 Land use and zoning ...	10
1.2.1 Land use ...	10
1.2.2 Zoning ...	14
1.3 Climatology and meteorological conditions ...	33
1.3.1 General meteorological conditions ...	33
1.3.2 Unique meteorological conditions ...	41
1.3.3 Solar radiation on site – direct radiation data ...	42
1.4 Air quality – current status ...	45
1.4.1 Ethnographic pollution sources ...	45
1.4.2 Background scattering calculations - current status ...	46
1.5 Current noise ...	56
1.6 Hydrogeology ...	58
1.6.1 Site drainage system ...	58
1.6.2 Hydrogeology description ...	66
1.6.3 Water sources around the site ...	78
1.7 Summary ...	80
1.7.1 The geological structure ...	81
1.7.2 Seismic intensity factor ...	81
1.7.3 Tectonic activities ...	83
1.7.4 Increasing seismic movements ...	87
1.7.5 Geological faults ...	88
1.7.6 Summary ...	89
1.8 Infrastructure ...	90

- 1.8.1 Infrastructure pipelines ... 90
- 1.8.2 End solution for sewage ... 94
- 1.9 Natural, landscape and heritage values ... 95**

- 1.9.1 Landscape units ... 95
- 1.9.2 Vegetation ... 106
- 1.9.3 Wildlife ... 107
- 1.9.4 Ecology summary ... 108
- 1.9.5 Heritage ... 108

Chapter B: Details of the reasons for preferring the proposed plan ... 110

- 2.1 General ... 110
- 2.2 Considerations that led to determine the proposed site ... 110
 - 2.2.1 Considerations that led to determine the proposed site in Ashalim ... 110
 - 2.2.2 Considerations that led to determine the space and boundaries for the Ashalim plan ... 113**
 - 2.2.3 The alternatives ... 118**
 - 2.2.4 Program of site ... 131
- 2.3 Advantages and disadvantages of proposed technology ... 133**
- 2.4 Backup alternatives ... 135

Chapter C: Description of activities resulting from execution of the proposed plan ... 137

- 3.1 General ... 137
- 3.2 Designated buildings and facilities on site ... 138
 - 3.2.1 Map of internal compounds ... 138
 - 3.2.2 Details of required construction work ... 140
 - 3.2.3 Characterization of designated steam boilers and turbines on site ... 146
 - 3.2.4 Describing the connection of the units to the electrical system ... 149**
 - 3.2.5 Implementation phases ... 150
- 3.3 Operating regime ... 150
 - 3.3.1 Principles of operation of the power plant ... 150
 - 3.3.2 The planned operating regime ... 151

3.3.3	Backup system operating regime ...	153
3.3.4	Cooling systems and water systems on site ...	154
3.4	Infrastructures ...	157
3.4.1	Quantities and types of waste water and solid waste that are expected on site ...	157
3.4.2	Measures to prevent infiltration of surface runoff from the environment ...	158
3.4.3	Water resources monitoring systems ...	171
3.4.4	Activities to restore landscape, fencing, signage, etc. ...	172
3.4.5	Impacts of truck traffic ...	172
3.4.6	Storage and transportation of oil and gas ...	179
3.4.7	Alternatives to brine treatment and management ...	179
3.4.8	Alternatives to water resources ...	183
3.4.9	Impacts expected from the security and defense system ...	183
Chapter D: Details and assessment of environmental impacts ...		185
4.1	Air quality ...	185
4.1.1	Fuel type and composition ...	185
4.1.2	Emission rates and concentrations of air pollutants ...	186
4.1.3	Backup system - Compliance with emission standards ...	187
4.1.4	Comparisons between solar power plants emissions and non solar plants ...	187
4.1.5	Concentration of expected air pollutants as a result from the production unit activity ...	188
	Plot A ...	189
	Plot B ...	190
	PV ...	191
	First run results ...	228
4.1.6	Climatology and meteorological conditions which may cause air pollution nuisances ...	250
4.1.7	Measures taken to reduce emissions from chimneys ...	250
4.2	Noise ...	251

4.2.1	Calculation of the division of noise rights coming out of the plants ...	251
4.2.2	Noise levels from the transport to the site ...	259
4.2.3	Noise levels in various activities related to site construction ...	260
4.2.4	Acoustic protection measures to be used if necessary ...	271
4.3	Hydrogeology and pollution of surface water and groundwater by fuels ...	272
4.3.1	Anticipated effect on surface runoff near the plant surroundings ...	272
4.3.2	Conditions that may cause fuel leakage in the fuel storage site ...	272
4.3.3	Measures and procedures for detecting and monitoring oil spill on site ...	272
4.3.4	Measures and procedures preventing groundwater and surface water pollution from oil leak on site ...	273
4.3.5	Number of fuel tanks and the volume ...	274
4.3.6	Calibration methods for the fuel tanks level electronic control system ...	274
4.3.7	Order of operations planned (by RBI plan) for external testing of fuel tanks ...	274
4.3.8	Principle plan for periodic internal treatment of the fuel tanks ...	274
4.4	Wastewater treatment ...	275
4.4.1	Solutions for collection, treatment and evacuation of wastewater and brines ...	275
4.4.2	Environmental impacts of water use on different systems on site ...	275
4.4.3	Procedure for disposal of drainage, industrial and sanitary wastewater ...	275
4.4.4	Mishaps, collecting volumes and the need for discharge to streams procedure ...	275
4.5	Natural Gas ...	277
4.6	Land use and zoning ...	277
4.6.1	Land use that may be harmed as a result of plant operations ...	277
4.6.2	Rezoning or land use as nuisances due to plant operations ...	278
4.6.3	Anticipated construction limits in land use due to plant operations ...	278
4.6.4	Possible effects of blinding aircraft by mirrors / collectors / reflectors ...	278
4.6.5	The possible effects resulting from radiation and heat emission of the solar panels ...	279
4.7	Appearance ...	280

4.7.1	Visual analysis of production site and both ways transmission systems ...	280
4.7.2	Impact of changes resulting from the construction of the plant on the construction and appearance of the area ...	297
4.7.3	Scenic aspects of the mirrored surfaces from different angles ...	297
4.7.4	Visual aspects of the chimneys, electricity transmission lines, pipelines and facilities ...	297
4.7.5	Possible measures designed to reduce and visual / landscape damage on the area ...	297
4.8	Seismology ...	302
4.8.1	Consequences expected due to earthquake (surface and groundwater pollution, air pollution, hazardous materials) ...	302
4.8.2	Measures for the prevention and treatment of pollution following an earthquake ...	302
4.9	Hydrogeology and groundwater salinity by salt water from the process ...	302
4.9.1	Suggested measures to prevent soil pollution of the water in the different systems ...	303
4.9.2	Recycling of rinse ...	303
4.9.3	Water filtration, material handling and filtered water discharge destination after use ...	303
4.10	Nature and landscape values ...	303
4.10.1	Expected effects caused to the natural environment as a result of the site construction ...	303
4.10.2	Possible measures designed to prevent negative effects ...	304
4.11	Hazardous materials ...	304
	Chapter E: User program proposal ...	305
