

Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	TI - Rete Mobile A Banda Larga
Project Number:	2012 0239
Country:	Italy
Project Description:	The project concerns the promoter's investments in Italy in the period 2012 – 2014 to increase the availability and quality of very high speed mobile broadband services. It comprised the installation of more than 10 000 new access nodes and thus introduced 4G/LTE based services to 28 m inhabitants (45% of population) and improved coverage of 3G/UMTS based services to an additional 3.6 m inhabitants (from 84% to 90% of population) in Italy.

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

There were no significant environmental or social issues noted by the promoter for this project.
