

## Environmental and Social Completion Sheet (ESCS)

### Overview

Project Name:	POZNAN FRANOWO TRAMWAY
Project Number:	20110339
Country:	Poland
Project Description:	The project consists of the construction of the extension of the tramway network of the city of Poznan from the Lecha residential area to the Franowo district. The line will be some 2.2 km long, with an underground section of some 1.1 km and 6 stations.

### Summary of Environmental and Social Assessment at Completion

**EIB notes the following key Environmental and Social outcomes at Project Completion.**

No significant environment or social issues were noted.

#### **Summary opinion of Environmental and Social aspects at completion:**

The project consists of the construction a 2.2 km tramway extension in the city of Poznan. Works started in April 2011 and were completed in August 2012.

The project fell under Annex II of EU Directive on Environmental Impact Assessment (currently 2011/92/EU), according to which the need for an EIA is decided on a case-by-case basis by the Competent Authority. The project was screened in and an EIA was carried out in accordance with EU and Polish regulations. Public consultation was carried out between May and June 2009.

The project was included in the Wielkopolski Regional Operational Program for the years 2007 – 2013, for which an SEA was carried out. The project was not expected to have any significant effects on the species and habitats of Natura 2000 sites at appraisal stage. In this respect, a formal confirmation was issued by the Competent Authority.

To the best of EIB's knowledge the environmental measures were implemented as prescribed in the project design and no significant environment or social issues were raised.
