

Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	STM R&D ITALY
Project Number:	2011 0299
Country:	Italy
Project Description:	The project related to the RDI activities performed by the Promoter focused on the development of technologies and products for the next generation of semiconductor devices. The development of new power electronics devices, leading-edge semiconductor logic devices and advanced micro-electromechanical systems (MEMS) were the main components of the project, which covered the full RDI cycle from the technology and manufacturing research, the development of the products, and the integration of the results into Systems on a Chip (SoC).

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

No significant environment or social issues were noted.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter that the Project has been implemented (in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
