

Environmental and Social Data Sheet

Overview

| | |
|--|---|
| Project Name: | <i>Imperial Innovation RDI</i> |
| Project Number: | 2011-0588 |
| Country: | UK |
| Project Description: | The promoter, Imperial Innovations (II) combines the activities of technology transfer, company incubation and investment. It aims to bring valuable ideas to market either by building businesses or licensing to industry, thus increasing the commercialisation of Intellectual Property (IP). Most of the projects are based on research from Imperial College London, but investments are also made in companies founded by or based on technology from the University of Oxford, the University of Cambridge and University College London. |
| EIA required: | NO |
| Project included in Carbon Footprint Exercise ¹ : | NO |

Summary of Environmental and Social Assessment, including key issues and overall conclusion and recommendation

The R&D activities encompassed within this project will not materially change current R&D practices and will be carried out within existing facilities. Thus, an Environmental Impact Assessment (EIA) according to the Directive 2011/92/EU is not required.

Environmental and Social Assessment

Environmental Assessment

R&D facilities and practices are in compliance with national and EU relevant regulation and the promoter maintains adequate internal procedures and management practices.

EIB Carbon Footprint Exercise

Project is not included - the EIB draft Carbon Footprint Methodologies only include emissions from Investment Loans, and large allocations under Framework Loans, above the methodology thresholds.

Social Assessment, where applicable

The clinical trials which are included in the project are performed under regulated and strictly controlled conditions, in existing specialised facilities which are regularly inspected by competent authorities - EMEA in Europe and/or national equivalent bodies in the rest of the World (FDA, PMDA, SFDA,..). The recruitment of patients is performed in accordance with the European directive (2001/20/EC) and/or equivalent international regulations in case of clinical trials performed outside Europe.

PJ/ECSO 14.12.11

¹ Only projects that meet the scope of the Pilot Exercise, as defined in the EIB draft Carbon Footprint Methodologies, are included, provided estimated emissions exceed the methodology thresholds: above 100,000 tons CO₂e/year absolute (gross) or 20,000 tons CO₂e/year relative (net) – both increases and savings.
