

## Environmental and Social Data Sheet

### Overview

Project Name:	TECHNICOLOR RD&I
Project Number:	2016-0419
Country:	FRANCE, BELGIUM, UK
Project Description:	The project relates to the financing of the promoter's RDI investments in France, Belgium and UK. The investment plan concerns imaging science, media computing, data processing and connected homes solutions. The RDI program will be implemented during 2016-2018.
EIA required:	no
Project included in Carbon Footprint Exercise <sup>1</sup> :	no

### Environmental and Social Assessment

#### Environmental Assessment

The specific RDI activities included in the project will not have any relevant environmental impact, as they relate to development of IT and engineering solutions to be performed in existing facilities without changing their already authorized scope.

Technicolor's products and activities (including this project) comply with the relevant EU environmental Directives, namely RoHS2 Directive, REACH Directives, WEEE Directive, EU Battery Directive and EU Packaging Directive. Technicolor applies ecodesign and energy efficiency principles in its development activities in line with the ErP (Energy-related Products) Directive.

The Connected Home Business Unit, which is responsible for designing and manufacturing CPEs (customer premises equipment), follows ISO/TR 14062, which integrates environmental considerations into the product design and development process. In addition, the company performs life cycle assessment based on standard ISO14040.

#### Other Environmental and Social Aspects

The promoter holds ISO 14001 certifications for its manufacturing sites.

The promoter is a signatory of the UN Global Compact and reports annually its actions in detail in the annual reports which are verified by an external third party (Deloitte).

### Conclusions and Recommendations

The project activities do not fall under Annexes I and II of the EU Directive 2011/92/EC as amended, and are therefore not subject to mandatory Environmental Impact Assessments. The proposed investments will take place inside buildings at existing RDI facilities without

<sup>1</sup> Only projects that meet the scope of the Pilot Exercise, as defined in the EIB draft Carbon Footprint Methodologies, are included, provided estimated emissions exceed the methodology thresholds: above 100,000 tons CO<sub>2</sub>e/year absolute (gross) or 20,000 tons CO<sub>2</sub>e/year relative (net) – both increases and savings.

Luxembourg, 15 November 2016

changing their already authorized scope, and are not expected to have a significant environmental impact on the surroundings.

The promoter emphasises the environmental considerations in the design and manufacturing of its products, and complies with all relevant regulations and recommendations related to its business.

Therefore, the project has been classified as acceptable in environmental terms for the Bank's financing.
