

Environmental and Social Data Sheet

Overview

Project Name: *MALIN CORPORATION – LIFE SCIENCES INVESTMENTS*
Project Number: *2015-0839*
Country: *IRELAND, UNITED KINGDOM*
Project Description: The project concerns the investment into innovative R&D intensive early stage companies in the life sciences sector.

EIA required: no

Project included in Carbon Footprint Exercise¹: no

Environmental and Social Assessment

Environmental Assessment

R&D facilities and practices are in compliance with national and EU relevant regulation and the promoter maintains adequate internal procedures and management practices.

Social Assessment, where applicable

The clinical trials which are included in the project are performed under regulated and strictly controlled conditions, in existing specialised facilities which are regularly inspected by competent authorities - EMA in Europe and/or national equivalent bodies in the rest of the World (FDA, PMDA, SFDA,...). The recruitment of patients is performed in accordance with the European directive (2001/20/EC) and/or equivalent international regulations in case of clinical trials performed outside Europe.

Conclusions and Recommendations

The R&D activities encompassed within this project will not materially change current R&D practices and will be carried out within existing facilities. Thus, an Environmental Impact Assessment (EIA) according to the EIA Directive (2011/92/EU as amended) is not required.

¹ Only projects that meet the scope of the Pilot Exercise, as defined in the EIB draft Carbon Footprint Methodologies, are included, provided estimated emissions exceed the methodology thresholds: above 100,000 tons CO₂e/year absolute (gross) or 20,000 tons CO₂e/year relative (net) – both increases and savings.
