

Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	Puratos RDI
Project Number:	20110574
Country:	Belgium
Project Description:	Food ingredient RDI focusing especially on development of new enzymes and nutritional components

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

The RDI activities, which formed the basis of the project proposed at appraisal will not change the current RDI practices and were carried out within existing research centres or production facilities without significantly adding to their environmental load. The RDI programme provided at appraisal does not foresee any investments which might fall under EIA Directive and/or the IED Directive. The R&D targeted healthier products with improved nutritional properties that should have positive impact on health.

You can rephrase the sentence: The investments under the RDI programme which was appraised, did not fall under the EU EIA Directive nor under the IED Directive.

The promoter confirmed that no significant impacts on environmental or social issues had occurred during implementation. All health & safety, as well as regulatory requirements, were achieved and complied with. No significant environment or social issues were noted.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion, based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards applicable at the time of appraisal.
