GAZIANTEP HEALTH CAMPUS (2013-0516)

If the Project had been located in the EU, it would have fallen under Annex II of the EU EIA Directive (2011/92/EU) in relation to urban development and the decision on the need for an EIA would have been up to the national Competent Authority. In line with the Turkish EIA Regulation, the opinion of the Competent Authority on the need for an EIA for the overall Project, and in particular for some of its components (concrete batching plant, tri-generation plant, boilers and helipad), has been sought and is pending. If the Competent Authority determines that one or more EIAs are required, the Project will be subject to the national EIA process as relevant.

In parallel and without prejudice to the national process, the promoter took the initiative, on a voluntary basis, to engage an international consultant to undertake an Environmental and Social Impact Assessment (ESIA) in line with international best practice. The resulting ESIA study, including the related Environmental and Social Management and Monitoring Plan (ESMMP) and Stakeholder Engagement Plan (SEP), have been disclosed on the promoter's website and are accessible through the following link:

<http://gaziantepihcproject-com.jimdo.com/english/esia/>

The Turkish version of the Non-Technical Summary can further be found on:

<http://gaziantepihcproject-com.jimdo.com/turkce/>

Any disbursement from the EIB will be subject to the delivery of the documentary evidence issued by the Competent Authority that the relevant environmental permits have been granted, following the satisfactory completion of the national EIA process.

If you have found a broken link or repeatedly can't access a page, please [contact the EIB](#) providing the name of the Project and the document or webpage you were trying to access. Thank you in advance for your help in identifying errors.
