

## Environmental and Social Completion Sheet (ESCS)

### Overview

Project Name: SCANIA 2020 FUEL EFFICIENCY  
Project Number: 2012-0341  
Country: Sweden  
Project Description: Development of a new truck platform aiming at improved fuel economy through aerodynamics and weight reduction, enhanced safety, improved driving conditions, load carrying capacity and repair and maintenance characteristics.

### Summary of Environmental and Social Assessment at Completion

**EIB notes the following key Environmental and Social outcomes at Project Completion.**

No significant environment or social issues were noted. The project concerned investments in research and development carried out in authorised existing facilities. Overall, the project had been assessed as acceptable having no adverse impact on the environment.

One of the main areas of focus of the company's advanced engineering activities concern the improvement of environmental characteristics and safety. Fuel consumption of the new platform is about 5% better than the previous generation.

#### **Summary opinion of Environmental and Social aspects at completion:**

EIB is of the opinion based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
