## Environmental and Social Data Sheet

### Overview

Project Name:	Medneo (EGFF)
Project Number:	2017-0420
Country:	Germany
Project Description:	The project concerns Medneo's installation of state-of-the-art diagnostic imaging equipment (CET and MRI) into existing public and private hospitals and centres over the period 2017-2019.
EIA required:	no
Project included in Carbon Footprint Exercise:	no

### Environmental and Social Assessment

#### Environmental Assessment

An EIA as foreseen under Directive 2014/52/EU amending the EIA Directive 2011/92/EU is not required for the type of projects carried out by the Promoter.

#### Other Environmental and Social Aspects

The Promoter is aligned to labour standards and is active in training staff to guarantee best measures of protection against safety and professional health risks. Waste management is also handled in conformity to national laws.

On a general note, the increase of access and quality of medical diagnostic services to the population will benefit the health status of the population and is seen as an element of social cohesion.

### Conclusions and Recommendations

The diagnostic centres included in the investment plan are conceived to have a reduced footprint, a modern layout, a reduced impact during construction and to use new materials and technologies.

In light of the above, the overall environmental and social rating of the project is therefore considered acceptable with no or minor negative residual impacts and eligible for the Bank's financing.
