

Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	<i>DAIMLER TRUCKS R&D PROJECTS II</i>
Project Number:	<i>2014-0067</i>
Country:	<i>Germany</i>
Project Description:	The project concerned RDI investments of the promoter's truck division to improve fuel consumption, reduce emissions and enhance overall efficiency of heavy and medium duty commercial vehicles. The R&D covered powertrain-related activities that include engine development, optimisation of after-treatment systems and development of hybrid technology, vehicle specific fuel efficiency activities (aerodynamics, weight reduction etc.) as well as implementation of the powertrain systems on the vehicles.

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

No significant environment or social issues were noted. The project concerned investments in research and development carried out in authorised existing facilities. Overall, the project had been assessed as acceptable having no adverse impact on the environment.

In parallel, the project had positive environmental impact as the developed products contribute to the reduction of pollutant and CO₂ emissions from trucks and busses.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
