

Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	SYMRISE HEALTH&NUTRITION FINE CHEM R&D
Project Number:	2012-0377
Country:	GERMANY
Project Description:	Financing R&D activities relating to fine chemicals used in food and health products.

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

No significant environment or social issues were noted. The project concerned investments in research and development that were carried out in existing facilities without changing their already authorised scope. Overall, the project has been assessed as acceptable having no adverse impact on the environment.

The project per se did not have any impact on the environment; however some of the R&D activities were focusing on the development of new products contributing to enhance the prevention of certain severe diseases. As a consequence, the project had a number of health benefits to society.

Summary opinion of Environmental and Social aspects at completion:

Based on the reports provided by the promoter, EIB is of the opinion that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
