

Environmental and Social Completion Sheet (ESCS)

Overview

Project Name: GRUPPO SORIN R&D
Project Number: 2013-0335
Country: France & Italy
Project Description: Financing of the Sorin Group research and development activities in the cardiac surgery, rhythm management fields and disruptive technologies related to heart failure.

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

No significant environment or social issues were noted. The project concerned investments in research and development carried out in already authorised existing facilities. Overall, the project has been assessed as acceptable having no adverse impact on the environment. The research activities undertaken in the project have resulted in new and improved medical devices in the area of cardiac rhythm management, heart valves and cardiac surgery, with a potentially positive social impact.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
