## Environmental and Social Completion Sheet (ESCS)

### Overview

|                      |   |
|----------------------|---|
| Project Name:        | ERAMET R&D NEW MATERIALS  |
| Project Number:      | 2013 0475   |
| Country:             | France (90%), Sweden (10%)  |
| Project Description: | The project concerns the promoter's R&D activities, mainly in France and to a smaller extent in Sweden in the period 2014-2017 in the field of new materials and alloys and for the improvement of the energy efficiency and the environmental impact of the promoter's extraction, metallurgic and transformation processes. |

### Summary of Environmental and Social Assessment at Completion

#### EIB notes the following key Environmental and Social outcomes at Project Completion.

No significant environmental or social issues were noted. This RDI project has been implemented in line with the Technical Description and expectations at the time of appraisal with no major issues on the environment. A number of the RDI projects carried out will lead to direct or indirect environmental and resource benefits, such as improved alloy qualities and metallurgical processes.

The promoter has a well-established environmental organisation with professional experts, also in all its subsidiaries. Almost all ERAMET production sites have in the meantime reached certified environmental management systems according to ISO 14001.

The company's publishes regularly CSR reports, the latest in 2016:
