Environmental and Social Completion Sheet (ESCS)

Overview

Project Name: GETINGE MEDICAL TECHNOLOGY RDI II
Project Number: 2014-0056
Country: Germany, Sweden, France
Project Description: RDI investments related to medical technology in the areas of cardiovascular, critical care and surgical workplaces during the period of 2014-2017.

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

The project concerned investments in research and development that have been carried out in existing facilities without changing their already authorised scope. An Environmental Impact Assessment (EIA) was therefore not required by Directive 2011/92/EU. The Promoter has an integrated environmental management policy and effective operating procedures in place, which are in line with best industry standards. The use of any animals for scientific research purposes within the scope of the project has been conducted in compliance with directive 2010/63/EU.

The research activities undertaken in the project have resulted in new and improved medical devices with a positive impact on healthcare quality. Therefore, the project has had a positive social impact.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter and site visits by the EIB team that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
