Environmental and Social Completion Sheet (ESCS)

Overview

Project Name: BRACCO MEDICAL TECHNOLOGY
Project Number: 2013-0211
Country: Italy
Project Description: Financing research and development activities in the pharma field of contrast media and contrast media injectors for the period 2014-2017.

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

The project concerned investments in research and development in the pharma field of contrast media and contrast media injectors that has been carried out in existing facilities without changing their already authorised scope. An Environmental Impact Assessment (EIA) was therefore not required by EIA Directive 2011/92/EU.

The research activities undertaken in the project have resulted in creating new diagnostic and therapeutic strategies improving health care quality and thus the project has a positive social impact. In addition, over time research has enabled a reduction of environmental impacts caused by the production of active ingredients.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
