**Public** 

# **Environmental and Social Data Sheet**

## **Overview**

Project Name: SAONE ET LOIRE PROGRAMME TRES HAUT DEBIT

Project Number: 2017-0595 Country: France

Project Description: The project relates to the design and roll-out of a publicly

owned passive fibre broadband network PIN ("Public initiative network" or "Réseau d'Initiative Publique" or "RIP") in the Saône-et-Loire department, France. The Project foresees that the Department will roll-out a fibre FTTH network covering up to 102 000 residential and professional premises in areas currently not served by commercial operators and where no operator is planning to deploy FTTH

network in the future.

EIA required: No

Project included in Carbon Footprint Exercise<sup>1</sup>: No

(details for projects included are provided in section: "EIB Carbon Footprint Exercise")

# **Environmental and Social Assessment**

#### **Environmental Assessment**

The project concerns fixed telecommunications systems that have limited environmental effects, apart from disturbances during civil work constructions, which will be mitigated by appropriate measures.

The tender documents of the construction and the concession stipulate that the bidders shall comply with all applicable environmental regulations and minimize the impact of the works. The reuse of existing infrastructures will minimise the environmental impact of the works.

## **Other Environmental and Social Aspects**

High-speed broadband networks allow the implementation of innovative services such as videoconferencing, telemedicine in those less densely populated areas. They can therefore have a positive environmental contribution.

<sup>&</sup>lt;sup>1</sup> Only projects that meet the scope of the Pilot Exercise, as defined in the EIB draft Carbon Footprint Methodologies, are included, provided estimated emissions exceed the methodology thresholds: above 100 000 tons CO2e/year absolute (gross) or 20,000 tons CO2e/year relative (net) – both increases and savings.

Luxembourg, 6 February 2019

# **Conclusions and Recommendations**

Investments in fixed telecommunications projects (including civil works for fibre rollout and transmission systems) do not fall under Annex I or II of the EIA Directive 2014/52/EU amending the Directive 2011/92/EU.

With the above measures in place, the project is deemed to be acceptable for EIB financing in environmental and social terms.
