Environmental and Social Completion Sheet (ESCS)

Overview

Project Name: Collagen Technologies
Project Number: 2015-0010
Country: Germany

Project Description: The project covers the promoter's research and development activities in the fields of novel pharmaceutical drugs and medical devices based on proprietary collagen technologies in the areas of wound care, tissue engineering and localized delivery of therapeutic agents.

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

No significant environment or social issues were noted. The project concerned investments in research and development activities carried out in existing facilities already authorised for that purpose. Overall, the project has been assessed as acceptable, having no adverse impact on the environment. The RDI activities undertaken in the project are aiming to result in new and improved treatments for diseases in different therapeutic areas, thus potentially generating a positive social impact. The use of any animals for scientific research purposes within the scope of the project, if applicable, has been conducted in compliance with directive 2010/63/EU

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion, based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
