A new initiative for transport

Future Mobility supports clean, digital and automated transport investments. It backs projects that reduce carbon emissions, increase energy efficiency and boost technological innovation.
The projects

**Clean** – Alternative fuels, new vehicles and their charging or fuelling mechanisms. Technology that fights climate change, reduces pollution and cuts noise.

**Digital** – Technology that makes the transport network more efficient and reduces congestion and damage to public health.

**Automated** – Innovative ideas that make it safer to travel.

**Telecommunications and energy** – Technologies and applications from other sectors, such as energy and telecommunications, or from innovative companies with experience in these sectors.

The benefits

- Access to affordable financing for risky projects with viable business models
- Long tenors and competitive pricing
- Advisory services to help projects succeed
- A quality stamp of approval that attracts more investors

Our offer

<thead>
<tr>
<th>Financing types:</th>
<th>Loans/guarantees/quasi-equity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financing limit:</td>
<td>Greater than €7.5 million</td>
</tr>
<tr>
<td>Covenants and security:</td>
<td>Depends on the transaction</td>
</tr>
</tbody>
</table>

Eligibility

Projects must involve the construction of new assets or the improvement of existing assets.

Beneficiaries must be in an EU country and part of the Trans-European Transport Network. This network is a group of roads and other transport infrastructure that the European Union plans to improve. Investments in other countries will be considered if they are for projects of common interest.

Beneficiaries must not have a substantial focus on restricted or excluded sectors. Here is a list of excluded activities: [www.eib.org/en/about/documents/excluded-activities-2013.htm](http://www.eib.org/en/about/documents/excluded-activities-2013.htm)
